

THE MORE THINGS CHANGE...

Helping kids develop their learning skills has always been a top priority for Boys & Girls Clubs. In the 1920s vintage snapshot above, for instance, two members enjoy the Boys Club of Schenectady's well-stocked library in upstate New York.

Nearly 100 years later, digital learning has become a significant part of the Club Experience. Below, Club kids learn critical hardware and software skills in the tech lab of the Boys & Girls Club of North Lake Tahoe in Kings Beach, Calif.

As new learning strategies emerge, Club programs and opportunities evolve accordingly. What never changes is our commitment to give kids the tools they need – educational and otherwise – to achieve their great futures.
