

Spend Less Time on I.T. and More Time Helping Kids

For more than a decade, Boys & Girls Clubs of America and Microsoft have worked together to help kids achieve Great Futures. Now, Microsoft is donating the **Office 365 for Nonprofits** software suite to all Boys & Girls Clubs.

Office 365 for Nonprofits is a core part of BGCA's long-term information technology strategy. It includes:

- **Office web apps** – The latest versions of Word, Excel and PowerPoint, essential tools you already know and use.
- **SharePoint** – As the foundation for the BGCA.net upgrade, SharePoint will enable organizations to collaborate on projects and share best practices easily and securely across our Movement.
- **Lync** – More “face time” via instant messaging and web video conferencing, and less time and money spent traveling.
- **Exchange** – Familiar and secure email, calendar and contact services accessible via Outlook, mobile devices and web browsers.

Moving to **Office 365 for Nonprofits** will simplify IT administration, reduce costs and significantly impact how we interact across the Movement. As a result, we can focus on what matters most: America's young people.
